Subject: zMOD Proposal - vote NO

Dear Board of Supervisors,

Please vote NO on the zMOD proposal. This changing in zoning needs to have a proper public hearing and review. The environmental impact (on humans, traffic, infrastructure, etc. in addition to nature) should be reviewed and shared with the community before voting. To vote upon such a dramatic change without allowing the public to be informed and share their concerns is not how our democratic republic should work. If proper information was made known, public hearings held, and then a vote held it would pass the sniff test. What you are doing does not.

An alternative is to put it to a public vote like we do with bonds. If we have to vote on bonds, why shouldn't this be put to the public? It has a greater impact than bonds.

zMOD might eventually be approved. Please vote NO now and have it approved or rejected with proper notice and consent of the Fairfax County citizens.

A concerned Fairfax County citizen,
Chris
